EDUCATION & OTHER

Bachelor of Science in Computer Engineering

University of Central Florida, Orlando FL

Active Clearance

WORK EXPERIENCE

Software Design Engineer

Sept. 2023 - Present

Cole Engineering, Inc.

- Prototyped, designed, and lead the development of a modular monitoring and reporting web app to generate system health reports, used internally and by the military
- Refactored every Grafana dashboard used by the IT team to take broken and legacy dashboards and bring the total number of working dashboards from ~20% to 100%
- Collaborated across multiple teams to host all of the company's internal applications on a Kubernetes cluster, including the buildout of the CI/CD pipeline to deploy, manage, and monitor the applications
- Developed an application to simulate a hospital's IT infrastructure, allowing the client to pen test their network and security infrastructure on demand

Application Developer II

July 2022 - May 2023

K16 Solutions (Remote)

- Developed and maintained a cloud-native application to migrate universities across the top 5 online course hosting platforms
- Responsible for the testing, validation, and monitoring required to migrate thousands of courses over a 4 month period for each project
- Undertook project to refactor Blackboard API endpoints and call wrappers through a major redesign, ensuring 100% parity during active course migrations
- Actively engaged with client representatives to gather feedback, address feature requests, and align sprint goals

Software Engineer

January 2021 - July 2022

Dignitas Technologies

- Developed and maintained the codebase for the company's flagship program as a full stack developer, contributing to numerous build releases
- Acted as a key liaison between the software and test engineer teams, participating in build tests and driving improvements within my own team through personal feedback
- Coordinated across multiple teams and projects in a leadership role to successfully navigate the company's CMMI Process appraisal

Web Developer

May 2015 - January 2020

Center for Distributed Learning

- Project lead for a web application that utilizes Office 365's API to analyze calendar data and automate the population of timesheets for part-time employees across UCF
- Lead Engineer for a web application made to deliver grade data visualizations in a dashboard format to enhance the student experience for UCF's Department of Health Sciences
- Full Stack Developer for Talent Roundup, CDL's hiring and application management suite
- Delegated tasks through GitHub issues and Trello, conducting code reviews, and QA tested code implementation on projects where a leadership role was necessary
- Conducted course content accessibility workshops for faculty, teachers, and staff

Freelance Web Developer

April 2014 - Present

DevinOps

- Developed and maintained websites for clients, including e-commerce platforms, portfolio sites, and custom web applications

PROFICIENT SKILLS

Frontend

- React
- Next.js
- Typescript
- Javascript
- Tailwind/TSS
- Jinja2
- HTML5 & CSS
- SQL
- Redux

Backend

- Django/Flask
FastAPI
- Node.js
- Typescript (again)
- Java (Spring Boot)
- RESTful APIs
- PostgreSQL
- MySQL
- MongoDB

Devops & Cloud

- Docker
- Kubernetes
- AWS (EC2, S3,
Lambda, ECS)
- CI/CD
- Prometheus
- Grafana
- Github Actions
- Ansible

Scripting & Automation

- Python
- Bash
- Powershell
- Selenium
- Playright
- Docker (again)
- Github Actions

Tools & Tech

- Git
- Github/Gitlab/
Bitbucket
- Linux/Windows/OSX
- Agile Methodologies
(Scrum, Sprints)
- Atlassian,, O365

AI & LLM

- Prompt Engineering
- Vector Databases
- MCP
- OpenAI Platform
- Agent CLIs & Editors
- Agent SDKs
- Agents & Sub-Agents

SELECTED PROJECTS

Vinyl Verdict

vinylverdict.fm

A music analysis platform that allows users to authenticate with Spotify using OAuth and have their music parsed and analyzed by different AI personalities.

Users can hold a mirror to their own music listening history and allow them to reflect and gain insight about themselves for whichever timeline they choose.

Bloom Solutions

bloomsolutionsfl.com

Part-time consultant for Bloom Solutions, which offers web development, SEO, and digital marketing services to clients.

I provide general consultancy, occasional web development, and best practice long-term solutions for their clients in the digital space. I also designed, built, and provide content updates to their website as needed.

DevinOps

devinops.com

Personal side-project agency focused on web development for small businesses and small-scale utility web applications.

This is my personal outlet that allows me to express my creative side through designing beautiful websites while also helping small businesses get off the ground.
